

NITEESH KUMAR PAL

Full Stack Software Engineer · React.js · Node.js · PostgreSQL

Noida, India | +91-7268802124 | niteeshpal801@gmail.com | linkedin.com/in/niteesh-pal | github.com/Niteeshpal

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of experience designing and delivering production-grade SaaS platforms. Proficient in **React, TypeScript, Node.js, and PostgreSQL**, with a strong foundation in modular backend architectures, high-performance APIs, and scalable frontend systems. Promoted from contract to permanent at RSG Media after delivering measurable performance improvements — including a **35% backend speed increase** and a **4-hour workflow cut to under 10 minutes**. Experienced with real-time event-driven systems using **Kafka**, and known for taking end-to-end ownership of complex features in fast-paced product environments.

WORK EXPERIENCE

Software Engineer — RSG Media

Mar 2025 – Jun 2026

Stack: React.js · Ant Design · AG Grid · Node.js · TypeScript · Express.js · PostgreSQL · Jenkins · Grafana

Developed scalable full-stack features for an enterprise rights and asset management platform serving 100+ enterprise clients.

- Designed and implemented **REST APIs** using **Node.js** and **TypeScript**, improving backend performance by **35%** through SQL query optimization and caching strategies.
- Built reusable, scalable UI components with **React** and **Next.js**, reducing frontend development time by **25%**.
- Architected backend services with **PostgreSQL** and event-driven pipelines using **Kafka**, enabling reliable, high-throughput data processing.
- Built a fully dynamic **User Activity Audit System** tracking what changed, who changed it, and when — with configurable, code-free trigger management across modules.
- Automated **CI/CD pipelines** using **Jenkins**, cutting deployment time by **40%**, and improved observability with **Grafana** and **New Relic**, reducing issue detection time by **60%**.

Software Engineer — MountBlue Technologies

Nov 2023 – Mar 2025

Deployed to RSG Media (Contract, 1 Year) · Stack: React.js · Node.js · Express.js · PostgreSQL · child_process · Nodemailer

Completed an intensive full-stack training program and applied skills directly as a contract engineer at RSG Media.

- Replaced a **4-hour manual Excel ingestion workflow** with a fully automated pipeline — upload → background parse (**child_process**, non-blocking) → validate → persist → notify — cutting turnaround to **under 10 minutes** and eliminating human error.
- Built end-to-end **React** interfaces for file upload, validation, and inline error handling, backed by **Node.js** REST APIs, with automated email notifications and a real-time data correction UI.
- Configured and customized product modules for **3 enterprise clients**, debugging and resolving production issues across frontend and backend.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML, CSS, Java, Python

Frontend: React.js, Next.js, Ant Design, AG Grid, Redux

Backend: Node.js, Express.js, REST APIs, Apache Kafka, child_process (background jobs)

Database: PostgreSQL, Sequelize ORM, MySQL, MongoDB

DevOps & Tools: Git, Docker, Jenkins, Grafana, Linux (Ubuntu, Red Hat), Postman, JIRA, VS Code

EDUCATION & CERTIFICATIONS

B.Tech — Computer Science & Engineering (Hons)

Graduated May 2024

Lovely Professional University, Punjab · GPA: 7.78/10 · Dean's List — Top 10%, Batch 2024

Certifications: Database Management — Infosys Springboard · Data Structures & Algorithms — Coding Ninja · Software Engineer — MountBlue
